Automatic Identification Systems (AIS) and its SCANALYST Division have been Authorized LINX System Solution Providers since 1985.

Our unique and advanced products enhance the performance any system and service associated with the following applications:

- Data Acquisition
- Document Tracking
- Inventory Control
- Item and Lot Tracking
- Machine Control
- Manufacturing Data Collection
- Order Entry
- Personal Identification
- Package Control Systems
- Production Control
- Property Identification
- Quality Control
- Route Accounting
- Shipping and Receiving
- Shop Floor Control
- Time and Attendance
- Vehicle Identification
- Warehouse Pick/Put Lists
- Work-in-Process

AIS, SCANALYST™ Division offers a full suite of barcode quality assurance tools for all industries. SCANALYST™ is in use by clients worldwide, including 3rd party EAN/UCC certification organizations. These systems help system integrators and solution providers and their users identify and correct potential quality and data problems before they occur, train employees, communicate with trading partners, maintain auditable QA logs, etc.

SCANALYST™ is available as an 'out of the box' barcode quality management system or with customized features to meet the specific needs of any application. SCANALYST™ will be used in the near future to validate RFID data with accompanying barcode data or human readable information.

AIS, SCANALYST™ Division and the firms that represent our proven products specialize in serving the following industries:

- Automotive
- Baking and Foods
- Beverage and Bottling
- Educational
- Government
- Hospital
- Health Care
- Pharmaceutical
- Manufacturing, Electronics and Electrical
- Paper and Printing
- Petroleum and Chemical
- Retail and Grocery
- Textile

SCANALYST™ is used by more than a 1000 user's worldwide and with moderate customization has been linked with business systems by several of the largest companies. Some examples of projects that have been linked with corporate business systems include an international vendor conformance lab for the retail and automotive environments, a healthcare distribution auditing system, and a standards organization for calibration conformance testing.

If you must have reliable barcodes for accuracy and productivity, then you will be interested in our products and services. If you are a data collection integrator that knows how much trouble bad barcodes can be, and you want to deliver strong, high integrity solutions and are interested in reselling our products/services please call us. We will consider associating on a sub-distributor basis with suitably experienced firms in the USA, Europe, Canada and Mexico primarily, but AIS has global clients and provides support via email where language barriers do not pose problems. Our system documentation is available in printed form or on CD-ROM as a part of product deliverables.
