Texas Barcode Systems has been an Authorized LINX System Solution Provider since the firm was formed in 1998. Before then, the principals of the firm and many of our staff had previously utilized LINX products in various system solutions for over 8 years.

We provide application systems and integration services for applications for industrial automated data collection, system integration to host systems, and others. We also provide turnkey solutions such as Tracx™ WMS, Print and Apply, Sortation, and Work-in- Process. These products and services, and customized solutions, are directed toward the following applications:

- Inventory Control
- Item and Lot Tracking
- Labor Scheduling
- Manufacturing Data Collection
- Package Control Systems
- Property Identification
- Route Accounting
- Shipping and Receiving
- Shop Floor Control
- Warehouse Pick/Put Lists
- Work-in-Process
- ERP Integration
- Warehouse management systems
- 3rd party logistics
- Automated data collection

In delivering these applications to a wide range of users, we have integrated our products into a variety of leading databases, host systems, ERP systems, basic inventory systems and etc.

Our products are designed and developed to serve the following industries:

- Automotive
- Baking and Foods
- Beverage and Bottling

- Educational
- Government
- Hospital
- Health Care
- Pharmaceutical
- Manufacturing, Electronics and Electrical
- Retail and Grocery
- Other: HVAC, any field service applications
- Distribution

When appropriate, Texas Barcode Systems works with user-localized sub-distributors to provide its applications throughout the USA and abroad. Our system documentation printed in the English language.
