Product: UltraTime Enterprise Software

In today's competitive environment, management requires accurate and timely access to employee information to minimize costs and boost productivity. Tracy, Inc. has been providing this capability to successful companies and institutions as an Authorized LINX System Solution Provider since 1987. We provide turnkey, web-based software and integration services for the following applications:

- Data Acquisition
- Labor Scheduling
- Manufacturing Data Collection
- Personal Identification
- Property Identification
- Shop Floor Control
- Time and Attendance
- Work-in-Process

**Web-based. User-friendly.** Enjoy a payroll day with less effort, less frustrations and less cost. We provide solutions that are accurate, convenient and reliable. The UltraTime Enterprise labor management system utilizes Microsoft's .Net Framework architecture to provide scheduling, punch processing and reporting in a real-time, on-line environment. The application brings a thoughtful design and intuitive user interface to a robust and efficient SQL backend.

The UltraView supervisor module provides managers with complete control over scheduling, punch editing and approval. The UltraTime Enterprise software is fully integrated with a number of modules, including payroll and HR interfaces for single point of entry, job costing, occurrence tracking, and benefit accruals. Most payroll products and services are supported, including ADP, Ceridian and Paychex. System documentation is provided in PDF format and accessible from within the software.
